

February 15, 1949.

Dear Aaron,

Esther and I will be coming to the meeting a week Friday, but I can't tell you yet what time it will be. Probably in the evening, not too late.

You'll be interested to hear that K-12 is lysogenic, in a very peculiar way. I don't think it has anything to do with recombination, but probably will make a good illustration of a cytoplasmic system like kappa. I hope to know enough about it by next week to be able to tell you.

We've bought an automobile, or rather a '35 Chevrolet, but I don't think I'll be able to trust it or the weather well enough to bring it down this trip.

With best regards,

Yours,

Joshua Lederberg
